Bibby Turboflex has remained a leading innovator in high performance flexible couplings and engineering solutions for rotating equipment for over 80 years. Reliability, safety and accuracy are vital in both new and established models. We strive to increase your return on investment by virtually eliminating downtime and optimizing efficiency.

**Pin and Bush Couplings**
The Eflex pin and bush couplings accept parallel, angular and axial misalignment and can provide considerable torsional flexibility. Vertical or horizontal operation.

**Gear Couplings**
Fully-crowned gear teeth. Available for use on vertical and/or horizontal shafts. Bore capacity up to 645 mm. High torque to weight ratio.

**Grid Couplings**
All-metal coupling that provides positive protection against the damaging effects of shock loads and vibration. Both horizontal and vertical cover designs are available.

**Torque Limiters**
Eliminates problems with reaction time and overload devices that may overheat. Torque limiters can be designed and manufactured to meet customers’ specific needs.

**Torque Modules**
Bibby Torque modules feature accurate release torque repeatability, fast manual re-engagement and low cost maintenance.

**Bibbigard Backstops**
Fitting a Bibbigard Backstop cuts out the danger of fully loaded conveyors running back for any reason. Non-lubricated, fail-safe, and operate without reliance on a power source.

**Torsiflex Pump Couplings**
All-metal disc coupling requiring no lubrication which incorporates a plug-in feature to allow installation and removal without disturbing the pump alignment.

**Carbon Fiber Couplings**
These floating shaft couplings incorporate composite tubes, which can be specified for spans of 10+ meters. They weigh up to 80% less than steel and eliminate the cost of bearing supports and other structures.

**Turboflex High Performance Disc Couplings**
Disc Couplings are stiff, light weight and capable of transmitting high torques at high speeds. They are easy to install, suitable for hostile environments, require no lubrication and feature a high torque to weight ratio.
